

WHO WE ARE

Sysny Technologies (Pvt) Ltd is a newly established company formed by an organization whose members have over a decade of experience and expertise in direct marketing, Information technology, Financial and Corporate management. Today we become a pioneer value added distributor of passive products relating to IT & Telecommunication industries that support voice, data and video systems. Our main purpose is providing best quality products at a very competent price,

The fundamentals of advanced business requirements consist of reassessing the entire enterprise infrastructure to ensure new technologies and applications are administered. Amalgamating industry's most innovative cable, connectivity and cable management systems, we provide solutions for most sophisticated intelligent networks.

Our product offering now delivers an infrastructure that anticipates change, provides complete protection, maximizes performance and delivers the bandwidth and reliability that is essential for high value data.

With over 20 years of industry experience & track records in the design and distribution of quality structured cabling products, we showcase an impressive list of system integrators and end customers today in Sri Lanka. We have never compromised on the quality & the service provided to the customer. We strongly believe in keeping the customers happy and constantly creating awareness with all the brands of components sold by us.

Sysny assists customers to identify and specify the required solutions and choose the product that suits their requirement and budget. We also educate our clients on new technology and standards with innovative ideas to maximize the overall performance and functionality of the installed infrastructure. We provide expert training to integrators as well as end customers to ensure efficient design and implementation of the network for a smooth functioning.

OUR VISION.

Sysny aims to be the best choice solution provider in data communication and passive products, through smart, innovative and ever-growing technical advancements to ensure the overall growth of business entities in collaboration

OUR MISSION

Our mission is to provide seamless, ubiquitous structured cabling and data communication products upholding, high quality, durability and absolute reliability to our valued customers through strong manufacture, partner and client relationships.

WHY CHOOSE US?

Latest technology and products

Our strength is the superior product knowledge we offer together with the latest technology and advanced products to suit various requirements. We provide intelligent network solutions which are efficient and stand out.

Support and Training on design, engineering and installation

We organize for a business partner training program in country or in manufactures facility to train our partners and system integrators on design, engineering and implementation to a high standard installation practice. The combination of our training and warranty provides our end customers with the assurance that their network infrastructure is supported throughout its lifetime

Inventory and logistics management

Ensuring proper standards of stock maintenance and logistics management, we ensure our clients a speedy, timely response to their requirements. We are able to meet specific client requirements and deadlines with the effective supply chain management practices.

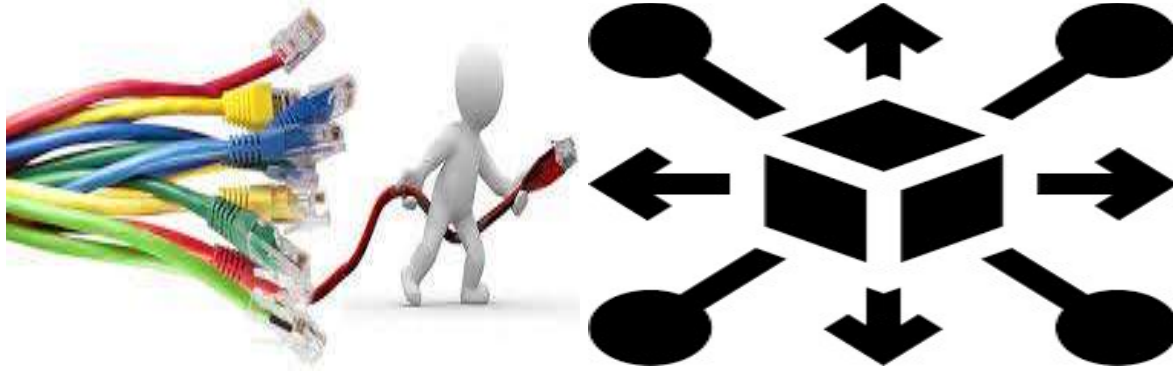

Delivery
